ASIO FOR BOOKING - ABLOY FOR OPENING DOORS

**WORKS WITH
ABLOY® OS**

**WORKS WITH
ABLOY® ENTRY**

**WORKS WITH
ABLOY® CUMULUS**

Asio Booking and ABOLY OS Access control solution work seamlessly together in Urhea Arena.

Access grants to Urhea facilities are generated during the booking process.

After the booking, the user receives a mobile credential to their phone, with which they are able to access the booked facility during their booking.

<https://www.abloy.com/global/fi/references/urhea>

” Keyless access is not only easy but also efficient, when there is no need for staff in the process. This is particularly important when there are diverse user groups with varying schedules. The mobile credential is also a significantly more environmentally friendly solution than physical credentials. ”

– Sandra Coloma, Customer Service Manager of Urhea

<https://urhea.fi/>

Järvenpää TrackMan Golf

JTG's ABLOY ENTRY solution is integrated with Asio Booking providing "BOOK – PAY – USE" service experience

" The solution works like a thought. First our customers book and pay for their preferred time slot in our golf simulator with Asio Booking. After this they will receive a unique door code for the booking via SMS. Door code is active ten minutes before the start of the booking and until half an hour after the end of the booking. "

– Jussi Vääntinen, JTG

OPENING ABLOY SMART LOCK WITH SMS DOOR CODE

- Asio Booking connects spaces with Abloy controlled doors and grants accesses to the facilities that require booking.
- The access can be granted with **SMS door code**.
- The door code is sent to the booker via **email** and **SMS**.
- The door will open with the door code during the booking.
- The SMS door code message text can be customized to a local language.

OPENING ABLOY SMART LOCK WITH HID MOBILE CREDENTIALS

HID
Compatible

ACCESS WITH MOBILE PHONE

- The access can be granted in Asio also with **HID mobile credentials**.
- The mobile credential works as a virtual access pass to the booked space.

The access grant for the booking is downloaded to the user's mobile phone.

The smart lock opens during the booking with a mobile phone.

View, how users of the **Urhea Arena** access their booked spaces with HID mobile credentials:
